github.com/thuong1804

I am a **frontend developer** with **two years** of experience, proficient in **Next.js, React, JavaScript, and Node.js**. I am eager to apply my knowledge and skills to create meaningful contributions to the company. With a strong commitment to continuous learning and innovation, I strive to bring value, efficiency, and a positive impact to the organization.

SKILLS

Frontend frameworks: : NextJS, ReactJS, Redux, JQuery, Bootstrap, Tailwind, AntDesign.

Programming languages:: Javascript (ES6, Typescript)

Backend frameworks:: NodeJS, ExpressJS

Database Management System:: MySQL, Firebase, SQLServer

Technical Skills : Reading and understanding technical documents in English.

Soft Skills: : Problem-solving, critical thinking, creativity, collaboration.

Version Control System:: Github, Gitlab

WORK EXPERIENCE

Front-end Developer

Sep 2023 - Present

Dai Truong Phat Education Solutions

Viet Nam

- Convert UI/UX designs (**Figma**) to responsive web interfaces.
- Develop and optimize web applications using **React.js, Next.js**.
- Integrate **RESTful APIs**, handle data processing.
- Debug and fix UI/UX issues to ensure stability.
- Collaborate via **GitLab, Jira, and Teams**.
- Work closely with BAs, report progress, and participate in Agile processes (**Daily Standup, Sprint Planning**).
- **Company Infomation:** <https://dtp-education.com/>

Front-end Developer Intern

Dec 2022 - Feb 2023

Lac Viet Company

Viet Nam

- Develop and optimize website UI with **Angular** based on design mockups and project requirements.
- Ensure responsive and user-friendly interfaces across devices.
- Maintain, debug, and improve UI features.
- Collaborate with backend developers, designers, and project managers to meet deadlines.
- Report work progress and update project status.
- **Company Infomation:** <https://lacviet.vn/>

Database Developer Intern

Apr 2022 - Jun 2022

Viet Tin Company

Viet Nam

- Design databases, including tables, indexes, and relationships.
- Write and optimize SQL queries (SELECT, INSERT, UPDATE, DELETE).
- Work with SQL Server for database management.
- Simport/export data using JSON and Excel.
- Document database structure, workflows, and usage guidelines.
- Apply and deploy database solutions using company tools.
- **Company Infomation:** <https://phanmemtinhuong.com/>

EDUCATION

Associate's Degree in Information Technology

Sep 2018 - Sep 2021

Thu Duc College Technology

PROJECTS

Content Management System(CMS) - Eduhomex [🔗](#)

Oct 2024 - Present

- Role: **Front-end developer**
- Technologies Used: **React.js, SCSS, CSS Modules, Ant Design, Redux**.
- Build reusable components with Ant Design (pagination, modal, table, form validation).
- Integrate REST API for seamless data flow and responsiveness.
- Implement advanced search with full-text and customizable filters.
- Manage global state with Redux and API fetching via dispatch.
- Manage global state using **Redux**, fetching API data via dispatch.
- Collaborate with backend for performance optimization and security.
- Write user manuals and provide CMS support.

ThnkAndGrow-Blog [🔗](#)

Sep 2024 - Mar 2025

- Role: **Front-end developer**
- Technologies Used: **Next.js, TypeScript, Tailwind CSS, CSS Modules, Apollo Client**

- Project Description:

Contributed to developing key features for a blog platform, including

+ **Tag Management:** Implemented a system for adding, editing, and organizing blog tags.

+ **Search Functionality:** Developed an advanced search feature for blog content, including a paginated search using a linked list for optimized performance.

+ **Third-Party Integrations:** Integrated Reddit and Facebook APIs to enhance content sharing and user engagement.

+ **Lazy Loading:** Optimized performance by implementing lazy loading for blog posts, improving page load times and user experience.

Content Management System(CMS) - LMS [🔗](#)

Aug 2024 - Feb 2025

- Role: **Front-end developer**

- Technologies Used: **React.js, SCSS, CSS Modules, Ant Design, Redux.**

- Build reusable components with Ant Design (pagination, modal, table, form validation).

- Integrate REST API for seamless data flow and responsiveness.

- Implement advanced search with full-text and customizable filters.

- Manage global state with Redux and API fetching via dispatch.

- Manage global state using **Redux**, fetching API data via dispatch.

- Collaborate with backend for performance optimization and security.

- Write user manuals and provide CMS support.

i-Test4u [🔗](#)

Apr 2024 - Aug 2024

- Role: **Front-end developer**

- Technologies Used: **Next.js, Tailwind CSS, CSS Modules.**

- Web design and development using **Nextjs**

- Receive requirements from BA and Tech Lead according to specification.

- Implement multi-language support, ensuring seamless localization and internationalization (i18n).

- Integrate the system with the backend via REST API, ensuring smooth data flow and responsiveness.

- The assigned functions are:

+ Multi-language integration.

+ Build activation code function.

+ Build learning analytics functionality using react chart library.

+ Build notification function.

+ Build user management page
